Dafin Mureșanu (Romania)	

Expect a diverse programme!
Look forward to a varied and interesting programme covering all aspects of neurorehabilitation with presentations by international experts from different disciplines providing a transnational and interdisciplinary opportunity to learn from each other and to integrate these findings into daily working practice.
You can expect high-quality plenary lectures, scientific symposia, informative and practice-relevant workshops, round tables as well as sessions specifically for young clinicians.

Look forward to the professional industrial exhibition!
Complementary to the scientific programme, the latest developments, and products, be it medical devices and applications or new pharmacological treatments, will be presented by the industry partners in the industrial exhibition. Latest developments will be highlighted during industrial symposia.
You would like to present your company at the congress? Then do not hesitate to contact Conventus for further details.
